## Special Guest for the March 12 Meeting: Willard Clay

At the March 12, 2024 CLCC meeting, we will have a special guest speaker, the photographer Willard Clay. A former Professor of Botany, Willard Clay has been a full-time photographer since 1982. Specializing in large format photography, Willard Clay has been the primary photographer for nine coffee table books and has been published in a myriad of calendars, magazines, books, and advertising agencies. His portfolio consists of large format film and high-resolution digital files ready for publication. You can view his images at [www.willardclayphotography.com](http://www.willardclayphotography.com).

Several club members receive *Therapy Photos*, a regular email that Will sends to former students and camera club members. He says, “I started writing the letters in 2020 during the pandemic to keep my newsletter readers communicating with each other because we were sheltering in place. They touched people in ways I could never have predicted and my readers did not want them stopped, so here we are 3 years and 230+ letters later.”

Be sure to attend the March 12, 2024 meeting!

## Tips and Snippets

*Submitted by Judy Jorgensen, CLCC President*

*from: VISION Enhancement Techniques Abrieta Hope, Landscape Photograph Workshops*

These techniques may help keep or recover ambient vision which is necessary for peripheral awareness, balance, coordination, and spatial awareness of which all are critical for landscape photography.

1. TAKE LONG WALKS OUTSIDE - without glasses on if possible.  
Big spaces encourage expansive vision.
2. CLOSE YOUR EYES - move them slowly and smoothly as far to the right as you can.  
Then move them to the left.  
Do this for 2 minutes.
3. WITH OPEN EYES, picture a LARGE clock in front of you.  
Move your eyes as far up as you can to see 12:00.  
Slowly move them clockwise 1, 2, 3, etc.  
Repeat counterclockwise.  
Next move your eyes again to 12:00 back to the center.  
Then, move slowly clockwise 1, 2, 3, 3, each time moving back to the center.  
Repeat counterclockwise.
4. FINGER PUSH-UPS  
With open eyes, hold one finger up at arms length away and bring it slowing to your nose.  
Keep your finger clear and single.  
Slowly move it back to arms length, then in again.  
This trains both eyes to work together.
5. PERIPHERAL AWARENESS  
Have someone stand behind with a stack of paper of different colors.  
Have them bring one color at a time forward for you to see.  
While looking forward, call out the color as quickly as you can identify it.
6. TAKE TIME TO STRETCH AND PRACTICE DEEP BREATHING  
If your muscles are tight anywhere in your body, your vision will be tight and therefore restricted and less efficient.

### Of the Earth

*The exhibition will run through spring 2025.*

Five large-scale sculptures by Polish American artist Olga Ziemska will be created exclusively for a new exhibition at The Morton Arboretum, **Of the Earth**.

The exhibition will explore the artist's expression and philosophy that, she says, "We are nature." Ziemska said that her aim is to remind people that "everything in life is derived from the same basic elements that form everything in nature, including ourselves. There is no separation." In Polish, Ziemska means "of the earth."

The artist's work will be created from reclaimed tree branches and other natural materials gathered from various locations throughout the Arboretum's 1,700 acres. "I am giving reclaimed natural materials a new life and transforming them from nature into new forms," Ziemska said.
